

Scatter plot showing Yeom advantage (average-case) for various datasets and models. The x-axis ranges from -0.05 to 0.15. A horizontal dotted line at y=0.5 represents random performance. Data points are colored by model: RF (green), LR (orange), GNB (pink), SVM (blue), and DNN (yellow). Labeled points include Gallstone, Breast Cancer, and a point for Gallstone at the top right.
